
Ari slider image disappears

Posted by LEBOSSS - 2014/08/14 09:43

Hi,
I have a big problem: Whenever I update my page, the ARI Image Slider Module is displayed for a few seconds then disappears ... I do not know why.
I am running joomla 3.3 and the website is www.beninfos.net

Thanks

Hello,

The slider doesn't contain images. It seems an incorrect value is used in "Image path" parameter in module settings.

Regards,
ARI Soft

OK, I found ...
Before the target folder was set "PUB" and I put "pub" in the settings ... now, I fixed it, and it works ... thank you very much.... You are great
