How do I change size of menu?

Posted by raholt - 2015/06/01 22:57

Hello,

How do I change size of menu in my AriSlider?

See screenshot: http://screencast.com/t/p9BdMAym

I want it to be 150x130 so I can have thumbnail images and then bigger once they click on it.

Thank you,

Ron

Hello,

For example if want to change thumbnails size to 60 x 80, add the following CSS rules:

```
BODY .ari_slider .ari_slider_menu UL LI
{
 height: 70px;
  width: 80px;
}

BODY .ari_slider .ari_slider_menu UL LI A
{
  height: 60px;
}

BODY .ari_slider .ari_slider_menu
{
 height: 70px;
}
```

and modify the following images to appropriate sizes:

/modules/mod_arislider/includes/js/img/active_bg.png

/modules/mod_arislider/includes/js/img/panel.jpg

Regards,
ARI Soft
