## Final Tweaks needed in slider - Need help

Posted by raholt - 2015/06/17 05:02

---

Hello,

I need your help in configuring the final things on my slider.

Please see video: <http://www.screencast.com/t/X93stlNPecH>

Summary from video:

1. Background image behind each thumbnail image needs to be removed. How do I do that?
2. How to increase the "bar" to 120 pixels high?
3. Left and right arrow need to be centered at 60 pixels from bottom. How?
4. How to remove space between images? Reduce by 5 pixels on each side of the line.
5. How to increase height of the line?
6. How to change the background color? Either transparent or another color?
7. How to remove the small dot that shows up on top of each of the pictures?

Thank you for your help.

Ron Holt

Hello,

Could you send a link to a page where we can see the slider?

Regards,  
ARI Soft

---

Hello,

I setup a temporary login as a "registered" user. This way you can see the page. I didn't think you would need to have Super Admin. I can do that but I don't want that login to be in a public forum.

Go to: <http://www.missiontoenhance.com>  
Click on: Team Login  
Username: arisoft  
Password: uziumauzi

Then click on "Meet Our Team"

Thank you,

Ron Holt

Add the following CSS rules:

---

```
.ari_slider_menu_wrap LI, .ari_slider_menu_wrap LI A, .ari_slider_menu_wrap {background-image: none !important;}
.ari_slider_menu_wrap LI A {padding-top: 0 !important;height: 100%;}
.ari_slider_menu_r_div {display:none;}
.ari_slider .ari_slider_menu_navleft, .ari_slider .ari_slider_menu_navright {top:50px;}
DIV.ari_slider {background-image:none;background-color: transparent;}
BODY DIV.ari_slider .ari_slider_menu ul li {width:150px;}
```

Regards,  
ARI Soft

Hello,

Where do I add these rules to the CSS? Where?

Also, if there is ever an update to AriSoft, it would overwrite these rules, correct? If so, is there a way to place this in a custom CSS file so it doesn't get overwritten?

Thank you,

Ron Holt

The custom CSS rules can be added to "Styles" parameter in module settings. Value of this parameter will not be overridden after an update.

Hello,

I asked, "Where do I add these rules to the CSS?"

You said, "The custom CSS rules can be added to "Styles" parameter in module settings. "

So now I have to ask, "Where is the "Styles" parameter in module settings."

Please understand, I don't know your program like you do. Can you please give me the specific location? I know have to wait another day before I get an answer and this delay is costing me.

Help.

Ron

---

Open "Extensions -> Module Manager" page on Joomla! backend, find "ARI Slider" module instance (for example select "ARI Slider" value in "- Select type -" drop-down), click by module name to open module settings page, find "Styles" parameter and add the custom CSS rules to it:

<http://www.ari-soft.com/images/fbfiles/images/slidr.png>

If you need more assistance, let us know.

Hello,

Please see my short video: <http://www.screencast.com/t/0QLwwQU6pEw1>

I just need two small tweaks that I asked for in the original video. We are so close.

Thank you,

Ron

---

Hello,

Use the following CSS rules instead of previous:

```
.ari_slider_menu_wrap LI,  
.ari_slider_menu_wrap {background-image: none !important;}  
.ari_slider_menu_wrap LI A {padding-top: 0 !important;height: 100%;padding-right:3px;}  
.ari_slider_menu_r_div {display:none;}  
.ari_slider .ari_slider_menu_navleft, .ari_slider .ari_slider_menu_navright {top:50px;}  
DIV.ari_slider {background-image:none;background-color: transparent;}  
BODY DIV.ari_slider .ari_slider_menu ul li {width:160px;}  
.ari_slider_menu {border-top: 1px solid #CCC;background: linear-gradient(0deg, #EEE, #FFF);}
```

Regards,  
ARI Soft

Thank you! It works! You are awesome!!

One more question that is regarding your slider but for my other site.

Please see video: <http://www.screencast.com/t/A9uJQZCtxcPK>

---

Would like to know if you could configure something like this?

Thank you,

Ron

---

Sorry, but customization of the extension is not a part of free support.

---

Hello,

Two Questions:

1. Can you customize your slider to do exactly what I showed you in the video?
2. How much would you charge? I am not expecting free support on that.

Thank you,

Ron

Could you send image(s) with comments (instead of a video) what you want to change? You can send it by email.

Regards,  
ARI Soft
