
Slider Doesn't Work

Posted by holdsworthdesign - 2010/07/21 15:24

Hi, I can't get the slider to work on my website. I've tested it with different templates and different things happen to the look, but in both scenarios it doesn't work. Here is the link: <http://www.holdsworthdesign.com/test-page>

Hello,

This issue occurs because 'ARI Slider' and 'Superfish Menu' module use jQuery javascript library and each of them loads it. 'Superfish Menu' is included after 'ARI Slider' module and clears all loaded jQuery plugins by 'ARI Slider'. We have updated the module and now it can work when several instance of jQuery are loaded. Download the extension in 'Member Area' on our site and upgrade 'ARI Slider' module, please.

Regards,
ARI Soft

Thanks for your help! That was the problem. I installed a plugin that loads jQuery and set both the menu and the slider so that they don't load it. That way it only get's loaded once. Thanks again!
