template

Posted by hassenjee - 2010/08/19 18:02

_____

Can someone please send me a sample template with a gradient in the back ground and a sample picture on the left and some text on the right. Just give me the codes to fill in the templates area, please.

I am not very familiar with these coding things, and would be nice if in the next version we can chose templates and get a start to it.

Thanks
