## CSS issues

Posted by 6degres - 2010/08/28 21:41

---

Hi,

When posting the module (out of the box), there are a few styling issues i'd like looked at:

1) The right side (next) icon doesn't show up although I set the correct width. I'm not sure if it's my thumbnail sizes that are causing this ?

2) In IE8, the menu background appears on top with the thumbnails and navigation at the bottom ?

You can see this at  
<http://www.6degres.ca>

Thanks,  
Danny

Hello,

Regarding to this post, you bought incorrect extension. If it's correct contact us by email, please, that we can change your order. If you really mean ARI Slider extension in this post, confirm it, please, and we'll investigate described issues.

Regards,  
ARI Soft

Iwent ahead and bought the other extension as well :-)

So, yes, this CSS issue applies to the ARI slider extension.

I had to display:none the bottom menu class and background for immediate purposes.

Thanks,

Danny

Please see  
<http://www.6degres.ca/realisations>

I moved the module here for you too see what I am refereing too

Re: ARI Slider (not easy slider)

Thanks,  
Danny

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,  
ARI Soft
