Can\'t get JNews Slider plugin to work.

Posted by kellir - 2010/08/31 01:09

_____

I have the smart content component installed. I would like to be able to use the J News Slider plugin. I input this in the smart content module in the parameters,

```
{arijnewsslider height="130" width="496"
articleSortField="ordering" articleItemCount="3"  articleSecId="2" articleCatId="5"}
{$title}
{$introtext}
   {/arijnewsslider}
```

I'd like for it to pull articles from that category into the slider. Do I also have to set parameters in the component plugin window. I tried adjusting setting there but nothing worked?

Thanks, Kelli :(

_____

Hello,

Could you provide link to page where we can see this issue and temporary access to your Joomla! backend by email that we can investigate this problem?

Regards,
ARI Soft
