
Basic Configuration Guide

Posted by NeilMcG - 2010/12/03 21:42

Is there a basic configuration guide available? Apart from the floating tips within the module config.

Hello,

Sorry, but we don't have this type of guide, but each parameter contains description in tooltip.

Regards,
ARI Soft

I'm looking for information on the demo setups.
The location of the menu thumbnails, etc.

Would it be easier to give you temporary access to the test site for you to configure - then I can use it as a template?

You can provide temporary access to your Joomla! backend by email and describe how you wish to configure the module and we will help.

Yes - looks great.
Thank you for the help. Much appreciated.
