
Joomla 1.6?

Posted by sprma - 2011/01/12 13:10

Hi!
I just installed ARI Slider on Joomla 1.6 and the configuration part of the module is missing.
Did I something wring, or is ARI Slider not (yet?) working on J1.6?

Best regards,

Matthias

Hello,

Provide your order number by email please.

Regards,
ARI Soft

Well, since the ARI Image Slider is free of charge, I can't provide an order number...

Sorry, but "ARI Slider" extension is discussed in this topic. "ARI Image Slider" and "ARI Slider" are two different extensions. BTW, we haven't tested "ARI Image Slider" under Joomla! 1.6 because it is only beta. We will check it under Joomla! 1.6 and let you know about the results.

Regards,
ARI Soft

Sorry, my bad! :(I hit the wrong topic...
But thanks for the answer anyway!

Matthias
