
Fatal error

Posted by bernd - 2011/01/28 13:33

I tried to update with Sexy Lightbox 1.8.0 and when I installed ASL Anywhere my site was down. I got the following message:

Fatal error: Cannot make non static method JModuleHelper::getModules() static in class AriModuleHelper in C:\xampplite\htdocs\Joomla15\modules\mod_arisexylightbox\includes\kernel\Module\class.ModuleHelper.php on line 6
I got to use phpmyadmin to make it undone.

Now only the plugin was activated and again the message appeared, this time with error on line 90. Ok, again I can use phpmyadmin.

Never change a running system?

Any Idea?

Regards

Bernd

Hello,

We have updated extension. Download new version in "Member Area" and upgrade "ARI Sexy Lightbox" module, "System - ARI Sexy Lightbox Anywhere" plugin and "System - ARI Thumbnails" plugin (if it is used).

Regards,

ARI Soft

Wow! That's what I call fast!

Excellent support!

Thanks!

Bernd
