Fly in from left / right instead of top / bottom

Posted by shanDB - 2011/02/07 13:38

_____

Hi, is there any way, or any modifications to the code that I can do to make the window fly in from the right side of the screen, instead of from top or bottom?

thanks

_____

Hello,

Do you mean "ARI Sexy Lightbox" or "ARI Sexy Lightbox Lite"?

Regards,
ARI Soft

_____

I'm currently using the lite version, to test out the fucttionality as make sure it's right for my purposes.

_____

Lite version is used Sexy Lightbox jQuery plugin. It supports only "top" and "bottom" value for flying effect, but you can modify it for your needs.

_____

does the full version have left / right options?

It's such a great plugin, and also quite cheap - But obviously I want to make sure it serves my purposes first. Pretty much most of my needs are met so far..

I don't mind doing a little hacking of the plugin if needed, but it would be nice if it had left/right options already.

Thanks for the prompt replies and great plugin

_____

Currently full version doesn't support this ability, but we will add this feature in the shortest period of time.

_____

We have updated the extension. New version supports "right" and "left" options for "Emerge from" parameter. Download and upgrade extension please.

Regards,
ARI Soft
