
Problem with image link inline content

Posted by tlwebdesign - 2011/02/20 11:55

Hi Guys,

First of all i like to say your support looks good. Forum, manuals and all. I searched the forums for my particular problem but i couldnt find it.

Okay here it goes:

I'm working on this website.

This website is a little different from a normal joomla website as for that the pages are modules instead of articles. The problem i have is that i want those white circles (image) to link to a popup with info and a image from a company.

This is how the code looks like:

Partners

```
{arisexylightbox activeType="icontent" width="300" height="250" link="" title="Hidden text"}Inline content which you want to show in sexy lightbox goes here.{/arisexylightbox}
```

I'm not so good with the code thing so i hope you guys can help me out on this one. I don't know what i'm doing wrong.

I do get it to work with a text link outside the div tags but thats not what i need.

Thanks for your help.

Tom

Hello,

Use the next code:

```
{arisexylightbox activeType="icontent" width="300" height="250" title="Hidden text"}  
{link}/{/link}  
{content}Inline content which you want to show in sexy lightbox goes here.{/content}  
{/arisexylightbox}
```

instead of:

{arisexylightbox activeType="icontent" width="300" height="250" link="" title="Hidden text"}Inline content which you want to show in sexy lightbox goes here.{/arisexylightbox}

IT WORKS!!!! and you guys are fast! it's sunday :woohoo:

You guys are great. gonna have to leave a great review on joomla.org!

Thnx a lot.

Have a nice day

Tom

You are welcome. Feel free to ask any questions about the extension.

PS: We will be very grateful for a review.

Regards,
ARI Soft
