
Parameter settings on the right are missing

Posted by Bartalbert - 2011/02/20 16:30

I installed plugin en module 1.9.19 on Joomla 1.6 Both installations were without error. When opening the plugin or the module there are options/parameters available on the right of the openingscreen of the module. I cannot change any settings. This version is 1.6 ready isn't it? I reinstalled all, but this didn't solve the problem.

Hello,

Sorry, but it seems you use not our extension. The latest version of "ARI Sexy Lightbox" is 1.8.8 and it works fine with Joomla! 1.5 and 1.6.

Regards,
ARI Soft
