
Examples using ARI Sexy Lightbox & Images gallery

Posted by franklt69 - 2011/02/24 17:16

Please where i can see some code example about how to use ARI Sexy Lightbox and Images gallery because this info is not enough to me

i need a little helph in that i have a page with several images and i wnat to show it like this example

<http://www.demo2.ari-soft.com/ari-sexy-lightbox.html>

regards
Frank

Hello,

You can use "ARI Sexy Lightbox" module, choose "Image Gallery" in "Choose type" drop-down, enter path(es) to image folder(s) in "Directories" parameters and configure other parameter or if you prefer use "System - ARI Sexy Lightbox Anywhere" plugin, use the next code:

```
{arisexylightbox activeType="imglist" dir="images/stories" thumbWidth="75"}{/arisexylightbox}
```

This code creates images gallery based on photo from /images/stories folder and created thumbnails with width equals to 75 pixels.

Could you explain your needs, do you want to create image gallery based on image from specific folder(s) or insert into article images from different location (do you need auto-generated thumbnail for it or no?) and show it into sexy lightbox with navigation button? Code from previous post is required that "System - ARI Sexy Lightbox Anywhere" was installed and enabled.

PS: We can help to configure the extension if you provide temporary access to your Joomla! backend by email.

Regards,
ARI Soft
