## ARI Sexy Lightbox In Joomla 1.6 Menu Troubles

Posted by kriegler - 2011/03/04 19:20

---

I am trying to add a menu item in joomla 1.6 Titled "Register An Account". When you click on this menu item I want it to open the lightbox and show an html file that I have written with a notice and two links. I had it working in joomla 1.5 but cant remember how I did it. I need it to work in joomla 1.6. Please help asap.

Hello,

Menu items can linked with the lightbox with help "System - ARI Sexy Links" plugin. Place necessary parameters in "CSS Selectors" parameter in plugin settings. If you have any problem with it, provide link to page where we can see the menu item and we will help to configure the plugin.

Regards,  
ARI Soft

What link do you want. To the administrator back end? If so how do I send a private message? Also is there a step by step instruction guide or something that shows you how to do this?

We need link to frontend page where we can see menu item which you want to assign with lightbox. Documentation how to use the plugin, you can find in "Description" field on "System - ARI Sexy Links" plugin settings page.

I didn't have to edit any CSS files last time to do this. Is there a way to make a link that will fit in the menu item and work as it did in 1.5

---

It is not necessary to edit CSS files, it requires specifying CSS rules into "Elements CSS selectors" parameter in "System - ARI Sexy Links" plugin settings. It can't in another way in Joomla! 1.5. The plugin woks in a similiar way in Joomla! 1.5 and 1.6.
