
V1.8.16 in 1.6 not retaining settings after saved

Posted by screamingfingers - 2011/03/22 23:29

I have installed V1.8.16 in J1.6, and when I add inline content, or choose a module or an article, and then save, sexy lightbox does not retain the settings after saved.

I have it set to open on certain pages.

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled. This requirement is described in readme.txt file from extension's archive.

Regards,
ARI Soft
