Files filter

Posted by eznet - 2011/03/29 13:47

Community Builder Profile Gallery generate images and thumbs in the same folder, the diference is the prefix of the files.The filename for thumbs is tnpg_number.jpg (ex: tnpg_0001.jpg) and the filename for image is pg_number.jpg (ex: pg_0001.jpg). What parameter I need to use for Files filter to display only images with prefix pg_ ? Thanks.

Hello,

Use the next file filter:

^pg_.*(jpg|gif|jpeg|png|bmp|JPG|GIF|JPEG|BMP)$

Regards,
ARI Soft
