
Only show first thumbnail and autostart slideshow

Posted by feschrch - 2011/04/11 06:46

Hi,

I recently purchased ari sexy lightbox and have 2 questions about it.

First of all I am looking for the parameter to autostart the slideshow. I read about it in extensions.joomla.org but cannot find it in the docu.

Also I tried several parameters I found to display only the first thumbnail, but I still see all.
This is the code I use to embedd the plugin:

```
{arisexylightbox activeType="imglist" dir="images/...;" thumbHeight="150" thumbType="resize" itemCount="1" count="1" single="true" opt_enableShow="1"}{/arisexylightbox}
```

Thanks for your help,

Fabian

Hello,

Use the next code:

```
{arisexylightbox activeType="imglist" dir="images/...;" thumbHeight="150" thumbType="resize" type="singleimage" opt_enableShow="1" opt_autoStart="1"}{/arisexylightbox}
```

Just enter correct path to image folder.

Regards,
ARI Soft

Thanks alot ;-)

Is there a way to get an overlay image on the thumbnail to let the user know that he has to click it?

Do you want to add border around image?

For example on this page <http://www.brass-swing.de/>
you see a small magnifier on the thumbnails

Thank you for the explanation. You can do the following:

1. Open "System - ARI Sexy Lightbox Anywhere" plugin settings and set "Image gallery -> Single image -> Template" parameter to:

```
{ $data:sexyimage }
```

2. Add the next CSS rules to site template CSS file:

```
DIV.thumb-icon-overlay
{
display: inline-block;
zoom: 1;
*display: inline;
position: relative;
}
```

```
DIV.thumb-icon-overlay DIV.thumb-icon
{
width: 20px;
height: 20px;
position: absolute;
bottom: 5px;
right: 5px;
background: transparent url(http://www.brass-swing.de/plugins/system/jcmediabox/img/zoom-img.png) no-repeat
center center;
}
```

Only change path to magnifier icon and set appropriate width and height in the second CSS rule.

Regards,
ARI Soft

Do you use Joomla! 1.5 or Joomla! 1.6?

Regards,
ARI Soft
