Click thumbnail to launch video.
Posted by screamingfingers - 2011/04/18 18:08

_____

I have several thumbnails that I want to be a link to open sexy lightbox with a video in it. I am able to create the link to launch the lightbox, but clicking an image doesn't seem to work properly because I can't figure out the thumbnail directory piece of code.

Thanks,

David

_____

Hello,

Sample code for showing SWF (or FLV) file in the lightbox when a user clicks by a thumbnail can be found here.

PS: If you need more assistance let us know.

Regards,
ARI Soft
