Migrate from J1.5 to 2.5

Posted by alin - 2012/11/22 08:32

Hi,
I want to migrate my site (Joomla 1.5 version) were I have over 150+ modules created with this wonderful ARI Sexy Lightbox. My question is: is an easy way to do this? there is any tool? or I have to export/import from database from modules table?
I saw some fields changed from 1.5 version to 2.5 so I must create a script, but maybe exist already and I can't see it here on site.
Thanks in advance.

Hello,

Sorry, but we don't have migration script from Joomla! 1.5 to 2.5 for "ARI Sexy Lightbox".

Regards,
ARI Soft
