## flowplayer controls dont work

Posted by finhatch777 - 2013/01/23 03:47

---

www.kickstart3d.com.au - when you click on the video in the bottom left hand corner, the mp4 opens in the lightbox using flowplayer - but I cant use any of the controls (volume, scrub forward, pause etc). Do I need to upgrade the flowplayer?? Or is there another setting somewhere?

REgards, Fin

Hello,

This is limitation of "Fancy" lightbox theme (semi-transparent bottom area are defined for title). Use another theme and the controls will work fine.

Regards,
