Same lightbox in two different links
Posted by macagb - 2013/01/30 23:22
_____

Hi,
I'm using ARI Sexy Lightbox to display two lightboxes in the same article: "Text A" and "Text B". But when I open them, I see the same text in both.

Here is the code IÂ´m using:

Paragraph A1

Paragraph A2

Text to show A

Paragraph B1

Paragraph B2

Text to show B

To help u understand here is the link: http://lotecircular.cl/index.php/equipo
or see thr screenshot attached http://www.ari-soft.com/images/fbfiles/images/screenshots_1and2.jpg

What am I doing wrong?
PLEACE HELP! :unsure:

Hello,

Check that you use different values of "inlineId" parameter in links. It should contain ID of element with content which you want to show into the lightbox.

Regards,
ARI Soft
