Hi everybody,

I installed lightbox and defined the image-directory. The folder path is ok but nothing is displayed.

Has anybody an idea what maybe wrong and perhaps an overview about the basic settings. The description is quite poor since there are no examples.

Thanks

Hello,

Documentation with examples is available [here](#).

We can investigate the problem if you send send screenshot(s) of module settings page (if you use "ARI Sexy Lightbox" module) or plugin code (if you use "ARI Sexy Lightbox Anywhere" plugin) by email and a link to a page where you try to use the extension.

Regards,
ARI Soft
