## how can i use a video player of my choice?

Posted by SanGo999 - 2013/02/22 12:51

---

i purchased the ari sexy lightbox.

now i have an issue. when refering to a video on my server the video starts with flowplayer including the flowplayer copyright at the background. how can i get rid of the flowplayer reference? or how can i use ARI lightbox in combination with a video player of my choice?

thanks! B) <http://www.ari-soft.com/images/fbfiles/images/lightboxplayer.jpg>

Hello,

The extension uses free version of FlowPlayer to show FLV video files (it requires a 3rd party player). FlowPlayer copyright can be removed if use paid version of the player.

If you want to use another player, contact us by email with details what player do you want to use and we will investigate possibility to integrate it with "ARI Sexy Lightbox".

Regards,  
ARI Soft

first: many thanks for the fast response!!!

actually i would buy the flowplayer if only it wasn't so ridiculously overpriced.

i mean 95 \$ for a single domain usage? that smells... :S

so i will look for another player and contact you afterwards via email.

thx for your help!

We chose FlowPlayer because it is popular player with a lot of good reviews and it has a free version, but if you want to use another player, it is not a problem. Just contact us and we will try to help.
