# Mootools and Jquery
Posted by blaci - 2010/04/16 13:55
_____

Hi!

I buyed your Sexy Lightbox module, but it not works together with mmbackground plugin.

As I see mmbackground use Mootools and your extension use Jquery.

Do you help me?

Here is the link:

www.blaho.hu/ramona

Thank you very much!

Sorry my bad english!

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,
ARI Soft

Oh, it works in Firefox. :-) Thank you!

But not in Safari. :-(

Any idea?

_____

It was a problem 'mmbackground' plugin. It contains the following code:

el.remove();

that is reason of problem in Safari and Chrome browsers. We updated 'ARI Sexy Lightbox' that it loads on page load event instead of DOM ready event.

Regards,
ARI Soft

_____

Are you fantastic!

And what can I do, if I like use it on my site? Download and install again? :-)

Thank you very much!

_____

We have installed updated version on your site, if it's required we can send updated version by email. We'll add possibility to select event for initializing lightbox in the next version of the extension.

Regards,
ARI Soft

_____

OK! Understand it! This site www.blaho.hu/ramona just a trial site, not the final. So, can you send the fixed version in e-mail?

Thank you very much!

Hi!

Sorry, but I found one more thing.

If I click to "Refresh" in Safari or in Crome, Sexy Lightbox not working anymore.

What is your opinion, is it possible to fix it? :-)

Thank You!

L.

Hello,

Could you specify what version of Chrome and Safari you use? We have checked it in Safari 3.2.2 and Chrome 4.1.249.1045 and we clicked 'F5' or 'Refresh' button, lightbox works fine.

Regards,
ARI Soft

I'm really sorry!

You are right! I checked it on Windows - Safari and Chrome - works fine

Checked on OSX - Crome - works fine. This is just an Safari (OSX) bug. :-(

I think, I really confused. :-(

I think I detected the real problem. Please try to click the "Afterburner" logo instead Refresh. The lightbox not worked for me on OSX and Windows (Chrome, Safari)

Is it possible?

Thank you!

I buyed your Sexy Lightbox module, but it not works together with mmbackground plugin.

As I see mmbackground use Mootools and your extension use Jquery.

You are fixed this problem, but now updated the plugin and module with this feature:

{arisexylightbox activeType="module" width="600" height="400" id="21"}{/arisexylightbox}

And not working again. :-(

Can you help me?
