Problem with deeper navigation

Posted by Kaseym - 2013/03/30 10:39

_____

Hi ARI team.

I'm having a problem using the module. I'm using modules anywhere and trying to bring up another module in a pop-up using your software.

The problem I have is that it will work on first level navigation but breaks on second level.
First Level Example : http://www.ski-livigno.com/gallery
Second Level Example (Broken) : http://www.ski-livigno.com/accommodation/hotels

When trying to open up on second level, which is the page I want it to actually work on I get this come at the end of the URL : #TB_inline?inlineId=asl5156c001a64a2&height=600&width=800&modal=1

All plugins are enabled. I've also attached an image with the settings for the module. http://www.ari-soft.com/images/fbfiles/images/proof.PNG

Hi there

Kasey works for me but didn't know my logon for the forum. Where would I find the order number please?

Cheers

Tim

_____

Hi there

That didn't help I'm afraid. However, we've found that uninstalling the plug-ins has fixed the problem.
