
scrollbar disappears on smartphone

Posted by Ujoomla - 2013/04/03 12:13

Hi,

How can I prevent that the scrollbar disappears on smartphone (Chrome, Firefox)?

See:

and attached image.

Hello,

Scrollbars don't appear due to limited support of "overflow" CSS property in mobile browsers.

PS: Content in the lightbox is scrollable, but browsers don't show scrollbars.

OK.

Thanks!
