## Size of lightbox targeting multi-device - opinions

What is the perfect size for lightbox targeting multi-devixes (smartphones as well as larger screens, tablets, laptops and so on) â€“ any opinions?

See attached smartphone screenshot of a lightbox with the size of 90%. It is well-sized but seems huge on a big screen!

Hello,

You can choose a size which is the most convenient for your content. We can't say "universal" size.

Hi,

thanks

this is, however, also meant as a forum topic, to get various opinions on the topic
