
Lightbox don't works in module

Posted by DanielSw2 - 2010/04/24 22:39

Hey there,

I want to show a image in a module and it should open in the sexy lightbox.
I've installed both plugins and the module contains that:

But it doesn't open in the lightbox, what's wrong?

Greetings,
Daniel

Hello,

Could you provide link where we can see this issue?

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/25 11:42

Hello,

Go to this: http://k190-d1.s34.tune-up-it.de/index.php?option=com_content&view=article&id=72&Itemid=43
User: Demo password: demo

On the left Side is Cover, there should be the image, but it isn't there.

Greetings,
Daniel

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/25 19:49

Hey,

Thank you, it works :)

I have an other question, i want to make a gallery and want that the thumbs generated automatic. What code should i use?

Thank You

Re:Lightbox don't works in module

Posted by admin - 2010/04/25 19:56

You are welcome :) If you want to create gallery based on images from specific folder(s), you can use 'ARI Sexy Lightbox' module or 'System - ARI Sexy Lightbox Anywhere' plugin. If you use the module, choose 'Image gallery' type and set necessary parameters, you can load 'ARI Sexy Lightbox' module into Joomla! content, if type the following code:

```
{arisexylightbox moduleId=""}/arisexylightbox}
```

where is necessary module id. Or you can type the following code into an article:

```
{arisexylightbox activeType="imglist" dir="images/stories;images/banners"}/arisexylightbox}
```

All available plugin parameters you can find in 'Description' field on 'System - ARI Sexy Lightbox Anywhere' plugin settings page.

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/25 20:14

so i want to slove it with the plugin and i typed that:

```
{arisexylightbox activeType="imglist" dir="images/sims3/hauptspiel/bilder/infoseite"}/arisexylightbox}
```

in my article, but it doesn't work. I've activated the plugin as well.

Re:Lightbox don't works in module

Posted by admin - 2010/04/26 06:39

Could you provide temporary access to your Joomla! backend by email and say page where you try to use the plugin?

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/26 16:11

Hey,

Thank you.

But now the gallery also display the thumbs and that's wrong right?
I think you should make a site with all codes for the sexy lightbox, then the description is not clear and userfriendly. You should make it like: <http://tools.yootheme.com/extensions/yoogallery>

=====

Re:Lightbox don't works in module

Posted by admin - 2010/04/26 16:24

It happens because the extension show all images from specific folder and all subfolders in this folder.
"images/sims3/hauptspiel/bilder/infoseite" folder on your site contains "thumbs" folder with thumbnails, we have added subdir="false" parameter to {arisexylightbox} tag that the plugin doesn't show images from subfolders.

PS: Thanks for your suggestion about code examples, we'll respect it.

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/26 18:48

Okay i've generated i small gallery but it looks not good.
See here: http://k190-d1.s34.tune-up-it.de/index.php?option=com_content&view=article&id=72&Itemid=43
Is it possible that it looks like that here:
http://simway.net/index.php?option=com_content&view=article&id=384&Itemid=34 but without the fade effect.

Re:Lightbox don't works in module

Posted by admin - 2010/04/26 20:29

You can add the following CSS rule to template CSS file:

```
TABLE DIV.asexybox-image
{
  background: #FFFFFF none repeat scroll 0 0;
  border: 1px solid #C8C8C8;
  float: left;
  padding: 1px;
}
```

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/26 21:46

Okay i should add this to my template's layout.css?

=====

Re:Lightbox don't works in module

Posted by admin - 2010/04/27 05:51

Yes or any other template CSS file.

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/27 14:38

Thank you, that looks good.
But the images are far away from each other, how can we make that they are closer together?

Greetings

Re:Lightbox don't works in module

Posted by admin - 2010/04/28 10:10

Add the following CSS rules to your template CSS file:

```
TABLE.sexy-table
{
    width: auto;
    margin: auto;
}
```

```
TABLE.sexy-table TD
{
    padding: 2px;
}
```

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/28 12:36

Okay thanks, i've added this to my layout.css but nothing happened.
Did i anything wrong?

=====

Re:Lightbox don't works in module

Posted by admin - 2010/04/28 13:21

layout.css file contains an error, find the following CSS rule, please:

```
.article ul {
list-style-image:url("sims3diamant_mini.png");
```

it does not contain a closing bracket. Correct it and type the following:

```
.article ul {  
list-style-image:url("sims3diamant_mini.png");  
}
```

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/04/28 17:24

Okay now it works, thank you!! :)
But there are only 3 thumbs per row...

=====

Re:Lightbox don't works in module

Posted by admin - 2010/04/28 21:26

You can set necessary number of items per row with help "itemCount" attribute of {arisexylightbox} tag. For example, if you want to display 4 images per row, add itemCount="4" attribute to {arisexylightbox} tag:

```
{arisexylightbox itemCount="4" ...other attributes...}/{arisexylightbox}
```

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/05/01 09:20

Thank works great thank you.

I want my Gallery splint into pages with the pagebreak. Is it possible that i can decide wich images are displayed? eg 1-20 and then on the next page 21-30? Or must i create new folders for each page?

Thanks

Re:Lightbox don't works in module

Posted by admin - 2010/05/01 20:32

Unfortunately the extension doesn't support paging functionaluty, but we'll think about adding this feature in a future release.

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/05/02 10:30

Oh :(
Where can i configure the thumb quality?

The Lightbox doesnt work on the second page, look here <http://k190-d1.s34.tune-up-it.de/basis/die-sims-3/bilder/screenshots.html>
what is the problem?

=====

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/05/03 14:29

For the problem that the lightbox doesn't work on the second page it could be useful that i'm using the core design Ajax Pagebreak plugin and the Core Design Scriptegrator plugin.

I hope that we can find a solution, when i disable the plugins then the lightbox works on both pages.

=====

Re:Lightbox don't works in module

Posted by admin - 2010/05/03 14:52

'ARI Sexy Lightbox' v. 1.2.4 is ready and it provides ability to specify thumbnails quality. Use 'Thumbnails quality' parameter for this. Regarding paging, if you provide link to page, where we can see this issue, and temporary access to your Joomla! backend by email, we can investigate this issue and try to help.

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by admin - 2010/05/03 16:10

We have investigated paging issue. It was a problem with 'CD Ajax Page Break' plugin because it can load only static content, it doesn't process javascript calls. We created 'ARI Sexy Lightbox CD Ajax Page Break' plugin for resolving this issue.

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/05/04 17:13

Thank you it works perfect.

Now i have a problem with the lightbox when videos on the same page,
the lightbox disappears behind the video and that's very bad: you can see it here <http://k190-d1.s34.tune-up-it.de/infos.html>

Re:Lightbox don't works in module

Posted by admin - 2010/05/04 19:38

This problem with flash object, add wmode="transparent" to tag and it'll work well.

Regards,
ARI Soft

Re:Lightbox don't works in module

Posted by DanielSw2 - 2010/05/31 21:56

Hey,
I've saw that the thumbs from my gallerys are saved in chache. It it possible that the thumbs are saved in the same folder as the images are?

Greetings,
Daniel

Re:Lightbox don't works in module

Posted by admin - 2010/06/01 08:01

Hello,

We can adjust the module and the plugin that they provide new parameter where a user can specify path to cache folder.

Regards,
ARI Soft
