
activeType=\"imglist\" from folder doesnt work

Posted by Heiko813 - 2013/05/06 13:43

Hey there..

i just migrated my website from joomla 1.5 to joomla 2.5.my problem:

```
{arisexylightbox activeType="imglist" thumbHeight="100"
dir="images/stories/attraktionen/cobra/2010_07"}{/arisexylightbox}
= WORKS
```

```
{arisexylightbox activeType="imglist" dir="images/stories/attraktionen/cobra/2010_07" type="customtext"}Click
me{/arisexylightbox}
= DOES NOT WORK
```

whats should be the problem? any idea?
do i need to install joomgallery for the foldergallery?

Hello,

Do you use the latest version of the extension? Where we can see the problem?

See here:

http://connyland.urimedia.de/jupgrade/index.php?option=com_content&view=article&id=677&Itemid=1082&lang=de

article code:

```
{arisexylightbox activeType="imglist" dir="images/stories/attraktionen/cobra/2010_07"}{/arisexylightbox}
```

1

```
{arisexylightbox activeType="imglist" thumbHeight="100"
dir="images/stories/attraktionen/cobra/2010_07"}{/arisexylightbox}
```

3

```
{arisexylightbox activeType="imglist" dir="images/stories/attraktionen/cobra/2010_07" type="customtext"}Click
me{/arisexylightbox}
{arisexylightbox activeType="imglist" dir="images/stories/attraktionen/cobra/2010_07"}{/arisexylightbox}

The lightbox with images appears when we click by "Click me" link. We have checked it in FireFox browser.

oh sorry my fault.

the click me link works, must the imglist tag before doesnt.

all three "arisexylightbox activeType=\"imglist\"" tags are in the article right now. but the galleries are not displayed (before

1" and between "

1" and "

2").

this tag works:

```
{arisexylightbox activeType="imglist" dir="images/stories/attraktionen/cobra/2010_07" type="customtext"}Click me{/arisexylightbox}
```

those does not:

```
{arisexylightbox activeType="imglist" thumbHeight="100"
dir="images/stories/attraktionen/cobra/2010_07"}{/arisexylightbox}
{arisexylightbox activeType="imglist" dir="images/stories/attraktionen/cobra/2010_07"}{/arisexylightbox}
```
