
Edit lightbox content CSS

Posted by Id_project - 2013/06/03 13:38

Hello,

I'm using ARI lightbox to display an article, but how do I edit its CSS? I tried to do it with "template.css" and "jquery.sexylightbox.min.js" but it is not working.

Thanks

Hello,

What CSS do you mean? Could you provide a link to a page where we can see the lightbox with an article and specify what do you want to achieve?

Regards,
ARI Soft

Sorry, actually I'm trying to change the appearance of the displayed article. The link is http://id-project.fr/espaceville/index.php?option=com_content&view=article&id=29&Itemid=147 click on "Bruno SCHMIT" at the bottom.

Well, I want to use a to change the color of the lower half of the lightbox to have the following result: <http://www.ari-soft.com/images/fbfiles/images/result-651e4279706b9cd894d4dc14ae656115.PNG>

in the article is empty element which doesn't occupy any space. It is not clear how it is related to the lightbox. The article can be loaded into a browser without the lightbox by this link.

Regards,
