How to close modal box after login

Posted by smolny1 - 2013/06/14 05:54
_____

Hello,

I am using "System - ARI Sexy Links" I got modal box open for login and register. My question is how to close a modal box, after login is completed, or any form submitted in that matter ?

my settings:

"A.registerblock"|width=800&height=600&tmpl=component

my link:

uRegister

www.ufasteddiez.com/index.php?option=com_content&view=article&id=78&Itemid=474

Best

Hello,

You can add a close button like is described here or execute the following javascript code on page which you want to close:

if (typeof(parent.window) != "undefined") parent.window.close();

Regards,
ARI Soft
