
Lightbox for Article Images

Posted by DanielSw2 - 2010/05/10 21:27

Hey there,

Actually we use a plugin called "smart resizer and mavik thumbnails". This Plugin create a thumb for images that we make smaller. Is it possible to choose the sexylightbox as lightbox?

Do this plugin the same? <http://www.demo2.ari-soft.com/joomla-thumbnail-component.html>

Best Regards

Do you want to create thumbnails for images in an article and display original image in sexy lightbox when an user click by thumbnail image? If yes, 'System - ARI Sexy Lightbox Anywhere' plugin provides this ability, only wrap necessary text block in an article with {arisexylightbox}/{arisexylightbox} tags. You can read about this feature in "How to create thumbnails for images in content" section in plugin description.

Regards,
ARI Soft

And how in this case the plugin should recognize for what images in an article to create thumbnails with lightbox effect? We can extend the plugin that it creates thumbnails for images with specific CSS class name, for example. If you have any other ideas, share them, please.

Regards,
ARI Soft

The plugin makes a thumg for every image you make smaller. And this images are open in a lightbox. In the backend you can choose form some lightboxes but not the sexylightbox

We can implement functionality of "mavik thumbnails" plugin in "System - ARI Sexy Lightbox Anywhere" plugin, but in this case they can't work together.

Wow very good.
I think you should list it on the extensions diretory too=)

'ARI Sexy Lightbox' v. 1.3.3 is available. It contains new plugin 'System - ARI Sexy Thumbnails'. This plugin creates thumbnails for images from Joomla! content and show original images in sexy lightbox. The most easiest way to use the plugin, insert necessary images in a WYSIWYG editor and resize them in WYSIWYG editor. In this case, the plugin will create thumbnails automatically when a user loads this page. You can download updated extension in 'Member Area' on our site. After this, upgrade 'ARI Sexy Lightbox' module and install 'System - ARI Sexy Thumbnails' plugin.

Regards,
ARI Soft

Hey,

Some trouble with the plugin.
The images only should display in the lightbox when they are made smaller.
Here is an example <http://83.169.43.105/downloads/user-downloads/view.download/5/2> the download button doesn't work.
Can you fix this?

Greetings

Hello,

Could you provide temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,
ARI Soft
