[ssl] difference http and https
Posted by uripress - 2013/06/20 15:02
_____

hi guys,

i have a page with an image on it. the image is not scaled (its original size) - normally in this case the lightbox dont create a thumb with a lightbox-link. you can see this here:
http://www.safaripark.de/de/aktuelles/young-stars-am-wb-tag.html

this image: http://www.safaripark.de/images/stories/2013/youngstars_banner.jpg

when u click it, you get refered to the youngsters...de-webpage.

PROBLEM:

when u browse to this url with ssl-certificate/https (here: https://www.safaripark.de/de/aktuelles/young-stars-am-wb-tag.html), "ARI Sexy Thumbnails" makes a thumb with lightbox-link on it. the hyperlink now referes to the ....jpg file instead of the youngster....de website.

i just upgraded to the newest version of lightbox.
i also tried both load jquery options, including jquery on/off, noconflict on/off and different jquery versions...

i hope u can help me.

thanks

==

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

_____

Try now please. We set "Ignore remote images" parameter to "Yes" in plugin settings.

Regards,
ARI Soft

_____

Ive been too early pleased ..

The lightbox isnt working anymore.. even without https..

_____

for example on this page (with and without https):
http://www.safaripark.de/de/aktuelles/gepardenanlage.html

by clicking this image http://www.safaripark.de/images/stories/aktuelles/geparden2.jpg

the code shows arithumb with lightbox link, but the image opens itself on a blank page instead of the lightbox..

hot, perfect!
once again: youre awesome!

what was the deal?

_____

It was a javascript conflict. We updated the module.

Regards,
ARI Soft
