
Can you link to a Google Search?

Posted by mattcurtis11 - 2013/07/30 20:44

Is there a way to link to Google or a set of Google search results?

Every time I put Google in the external page that is shown it is blank...I'm using Chrome.

Hello,

Google prevents loading of their pages to frame elements (returns a blank page). It is possible to load Google pages only to main browser's window.

Regards,
ARI Soft
