
white bar across top of black theme

Posted by aczdreign - 2013/09/26 17:51

This should be my last question for the day:

I've got my lightboxes set up and everything is working properly. My final issue is the white bar that sits at the top of the lightbox when a black theme is selected. The white ones work fine, but don't match my site template.

Add "background=#000" parameter. Code will look like:

"UL.nav LI.item-156 A"|width=500&height=80%&background=#000&tmpl=component

Regards,
ARI Soft
