## Article in on click event

Posted by eronny66 - 2013/09/27 18:43

---

Hello,

Is it possible to show an article in a lightbox with an onclick event.

I want to add the lightbox effect on a couple of pictures in wowslider wich i added to my joomla site.

When i click on a picture in the slideshow, i want an article to appear in lightbox.

It is possible to add a link for every picture in the slider.

Can anyone help me with this ?

Thanx in advance

=====

Hello,

Could you send a link to a page with the slider?

---

The site isn't yet online.

I have made an article with id 2, and when i click on as example, a picture, i want that article tot be displayed in a lightbox.

Is that possible, and what do i have to do to get it working.

You can read how to do it with help of "System - ARI Sexy Lightbox Anywhere" plugin here.

---

Thanx for your help,

---

But when i call the article from the link, i first get a  
show article line, and when i click it the lightbox it started.  
But i want the lightbox started directly on the first click.  
(so without an extra text where i have to click on)

In the link url of the picture i've placed :  
index.php?option=com\_content&view=article&id=2&tmpl=component&TB\_iframe=1&width=800&height=600.

I expected that would start the article in the lightbox.

When that didnt work, i have added the code :`{arisexylightbox activeType="article" width="300" height="300" id="3" title="Article" }{/arisexylightbox}`  
in article 2, and hoped that that will start the lightbox with the text of article 3.

But nothing happened.

So, i need a bit of help

Thanx in advance

Do you want to show the lightbox with an article on page load without click?

---

no, not on page load, only when a picture is clicked.

---

It is not clear, what's problem with the following code:

```
{arisexylightbox activeType="article" width="800" height="600" id="3" title="Article"}{/arisexylightbox}
```

Could you send image(s) with explanation where we can see what doesn't work?

Regards,  
ARI Soft

I wil setup a small website on my server, to show you the problem.

---

I give you the link when i am ready

<http://www.vanlinda.nl/>

I have added a picture, in the picture i have a link to :  
`index.php?option=com_content&view=article&id=1&tmpl=component&TB_iframe=1&width=800&height=600`

When i click it, just the article one is displayed, but not in a lightbox.

And i want to click it and see the article in the lightbox.

I can give you a username and password if you need access tot the administrator page.

If you prefer to use "System - ARI Sexy Lightbox" plugin instead of "System - ARI Sexy Lightbox Anywhere" plugin then add `rel="sexylightbox"` attribute to `tag`.

HTML code will look like:

instead of:

---

Hmm, I added the `rel="sexylightbox"` (with the & sign, and without is) to the link in the picture, but it still displays the article without the lightbox  
i have made a guest/guest login for you at the administrator page.

---

See the code in our previous post. `rel="sexylightbox"` is attribute for `tag`, it is not a parameter for link.

Thanx !

solved, now i just have to figure out how to add the rel attribute  
to the woslider content.

you helped me a lot !

Thanx, enjoy the weekend
