Play flv video in Android
Posted by aksmith - 2013/09/28 14:58

Hello:
Is there an option to use the plugin to run flv video on Android devices?
Using the plugin, I get 'the This plugin is not supported' error.
If I run flv using the JCE html5 player, then the video file downloads to play immediately on the devices.
That would be acceptable, too.
Thank you!
-Alan

Hello,

Download and upgrade the module. After this clean browser's cache.

Regards,
ARI Soft

?
1. I am using the plugin, not the module.
2. I just purchased/downloaded the latest versions.

---

1. Javascript and CSS files are located in a module folder.

2. We have updated it after your post.

Thank you for the quick response!
I downloaded/installed module.
Cleared site and browser caches.

Still getting the same error message on my Android - pops up when I use a brand new browser as well.

You can test the site (in beta) at:
http://cities-webdesign.com/careerclinic/

The video is the bottom module 'Sample the Talk Show'

The video is shown not in "ARI Sexy Lightbox". Another lightbox extension is used for the video.
