
Change Module

Posted by DanielSw2 - 2010/05/26 20:32

Hey there,

i want to use the sexylightbox module for my infopanel and here is an example: <http://k190-d1.s34.tune-up-it.de/sims2-wilde-campus-jahre-infos> (user: demo, pass: demo)
It works good but i want that at the top and the bottom is more space, is that possible?

Regards

Hello,

Where you need more space, in lightbox?

No I need it in the module not in the lightbox.

You can add necessary padding or margin in WYSIWYG editor for 'Custom Output' parameter of your 'mod_custom' module.

But I use the mod_arisexylightbox and not mod_custom.

Maybe we are talking about different modules, do you mean module which you can see on image in attach? If yes, this is mod_custom module with name 'Cover || Die Sims 2 Wilde Campus-Jahre' and 'System - ARI Sexy Lightbox' plugin is used for adding lightbox effect to image from mod_custom module content. If you want to add more space surround images from this module, add this to content of this mod_custom module. If you want to add more space for all modules in right position on your site, you can add the following CSS rule to your template CSS file:

```
#right .box-2 div
{
    margin: 20px 0 !important;
}
```

but keep in mind, it adds additional space for all modules in 'right' position, not only for module with sexy lightbox.

Oh i sent you a wrong link, sorry. I mean this page here: <http://k190-d1.s34.tune-up-it.de/sims2-nightlife-infos> on this page i mean the module "die sims 2 nightlife bilder". There i want more space at the top and bottom.

Greetings

You can do the following:

1. Open module settings page and set 'Image Gallery -> Simple Gallery -> Container CSS class' parameter to 'sexy_padding' for example.
2. Add the following CSS rule to template CSS file:

```
TABLE.sexy_padding
{
    margin: 20px 0;
}
```

Regards,
ARI Soft
