Documentation needed

_____

Hello ARI Team
I have just purchased ARI Sexy Lightbox in order to use it in a ZOO (YooTheme) article.
I would be thankful if you helped me to create an image gallery.
Do I have to use the module and publish it in the ZOO article?
What code do I need?
Are the thumbnails auto-created?
I don't know where to start from!
A simple example would be a hint for me.

I hope all these make sense.
Thank you in advance

Re:Documentation needed

_____

Hello,

Thanks for your choice of our extension. Regarding documentation, 'ARI Sexy Lightbox' module and all plugins from package contains documentation in 'Description' field on settings page. If you want to create image gallery and display it in any Joomla! content, the most of easy way, install 'ARI Sexy Lightbox' module and 'System - ARI Sexy Lightbox Anywhere' plugin, then open module settings page, choose 'Image Gallery' type in 'Choose type' drop-down, configure other settings and save module. Then you can load module in Joomla! content, just type the following code:

{arisexylightbox module=""}{/arisexylightbox}

where is ID of necessary 'ARI Sexy Lightbox' module.

Regards,
ARI Soft

Re:Documentation needed

_____

Thank you for your instant reply!
I have just did all the above.
Now, I can publish an image gallery through the module in every template place. That's OK.
But I can not publish the module in my ZOO article.
ARI Plugin Everywhere is Enabled!
The syntax is OK. And I indicate the modile ID as you wrote me.
But nothing
Any help is appreciated.

Re:Documentation needed

_____

Could you provide temporary access to your Joomla! backend by email and say link to page where we can see this issue?

Regards,
ARI Soft

Re:Documentation needed

Posted by borat - 2010/06/06 20:06

_____

I can not even publish it in a single Joomla article!
This is my syntax:
{arisexylightbox moduleid="126"}{/arisexylightbox}

Is that correct?
System - ARI Sexy Lightbox Anywhere Plugin is Enabled (Mode Anywhere)
System - ARI Sexy Lightbox is Enabled (has to be?)

Any idea?

_____

Type the following code instead of your code, please:

{arisexylightbox moduleId="126"}{/arisexylightbox}

In other words, use 'I' instead 'i' in 'moduleId' attribute.

Regards,
ARI Soft

_____

Ohhh, It was so simple!!!!
But I was in a panic mode!
Thank you so much

SOLVED
