
I SEE THUMB IN A LIGHT WHERE MAIN PIC SHOULD BE!

Posted by zelezny - 2010/06/06 21:40

Either for manual settings or for autogenerated.
Whats wrong?

Hello,

Probably image folder(s) contains subfolders with thumbnails? You can try to set 'Scan subfolders' option to 'No' in module settings. If it doesn't help, provide temporary access to your Joomla! backend by email, please, that we can investigate this issue.

Regards,
ARI Soft
