## Wont work in a module

Posted by johnelk - 2014/01/13 15:28

---

ARI Sexy Light Box Lite has always worked perfectly when used as a plugin in an article. However when I create a custom HTML module in Joomla (1.5.26), and use exactly the same code there, the image is displayed but without all the nice sexy bits. Have tried it with Firefox and IE but still no luck. Puzzled.

Hello,

Could you send a link to a page where we can see the problem and your order number by email?

Regards,  
ARI Soft
