## Selecting spesific single Flickr image

Posted by Arnstein - 2010/06/15 20:46

---

Hi

I'm looking for a Flickr gallery plugin and would like to knowe if your Sexy Lightbox plugin supports:

a) Showing only a single selected image from one of my Flickr sets (in an article)?

and

b) Displaying a single image from a Flickr set and then shows the rest (or spesific number of images) of the gallery as thumbnails when the single image is clicked?

Best regards

Arnstein

Hello,

Thanks for your interest in our extension. Regarding your questions:

Currently the extension can display the first image from photoset and if a user clicks by this image, display all images from photoset(s) in lightbox or the extension can display all images from photoset(s) as thumanbils and if a user clicks on any thumbnails display large image. If you need extended functionality, we can implement it in a future release.

Regards,

ARI Soft

---

Thanks for quick response.

Does this mean I can not choose to show only one selected image from one of my photosets (except the first one)?

Could you explain you want to show an image from Flickr photoset by specific index, random image or what image from photoset you want to show?

Regards,

ARI Soft

---

Hi

My Flickr photos are organized into categorized sets. For album purpose, it is fine to show an entire set or parts of an entire set. However, in news articles I would like to be able to display a single photo identified by the Flickr photo id.

---

Hope this explains better.

Best regards  
Arnstein

Hello,

We have updated the extension. New version can display an image from Flickr photoset by photo ID and if a user clicks by this image shows others in lightbox. It can also display only part of images from photoset(s) on a page and display others in lightbox.

I've now downloaded and added the mod\_arisexylightbox module and the arisexylightboxanywhere plugin. However, I haven't figured out the syntax to use in an article to specify a single image from a Flickr stream or photoset (identified by photoid). Can you helpe me with this please?

regards,  
Arnstein

---

Do you want to use the plugin for this purpose or the module?

---

I was opting for the plugin to use in articles so I won't have to create a new module for each new article containing an image.

We have updated 'System - ARI Sexy Lightbox Anywhere' plugin. Download 'ARI Sexy Lightbox' package in 'Member Area' on our site and upgrade 'System - ARI Sexy Lightbox Anywhere' plugin, please. After this open plugin settings page, enter Flickr API key into 'Flickr gallery -> Flickr API key' textbox and save settings. Type in a article the following code:

```
{arisexylightbox activeType="flickr" type="flickrimage" source="photoset" photosetId="" photold=""}/{/arisexylightbox}
```

where is photoset(s) ID(s) and is photo ID from loaded photoset(s).

## Re:Selecting spesific single Flickr image

Posted by Arnstein - 2010/06/19 18:34

---

Installed the 1.3.15 version and added this to my article without success:

```
{arisexylightbox activeType="flickr" type="flickrimage" source="photoset" photosetId="72157623720867624" photold="4470057394"}{/arisexylightbox}
```

The API-key is defined in my plugin and displaying a photoset still works.

Is there a typo I haven't caught or any other spesific parameters I need to use in the plugin?

regards  
Arnstein

We have tried this code on our test server and everyting works fine. Could you provide temporary access to your Joomla! backend by email and link to page where you try to use the plugin that we can investigate this issue?

## Re:Selecting spesific single Flickr image

Posted by admin - 2010/06/21 11:06

---

Try now, please. It seems you have used copy-paste method for adding parameter to {arisexylightbox} tag and your WYSIWYG editor added some extra HTML tags which broke correct plugin code.
