No swipe on windows-tablet

Posted by nick - 2014/04/07 19:40

_____

Trying the swipe-feature of a slideshow but cant get it to work on a windows-tablet?
Swipe does work on a mobile, but looks very strange with pictures not being fullscreen?

_____

Hello,

Try to add the following CSS rule to a site template CSS file and clean browser's cache:

#SLB-Contenedor {
  -ms-touch-action: none !important;
}

Regards,
ARI Soft
