
404 for Vimeo Videos

Posted by mloeb - 2014/04/14 14:25

Hello,
I'm trying to load Vimeo videos in these lightboxes and I keep getting 404 errors, though the links are correct. The site is running locally now, so I don't have an example to show.

Hello,
If you use the module, send screenshot(s) of module settings page by email. If you use plugin, send plugin code which you use.

Regards,
ARI Soft

Solved, I wasn't formatting the links properly.

I have also this problem. I have got the images to work with Quiz but now when I try to include the Vimeo link that you are using on the demo page for sexy lightbox I got a 404 message.

```
"a href="http://vimeo.com/8245346?width=500&height=350&background=#000" rel="sexylightbox" title="Vimeo video">Play Vimeo video" http://www.ari-soft.com/images/fbfiles/images/Arivideo.PNG
```

The sample code is here. Add `http://` before `vimeo.com`

I must have done something wrong with cut & past so I made a screen dump instead. For me it looks right. http://www.ari-soft.com/images/fbfiles/images/Arivideo_2.jpg

Re:404 for Vimeo Videos

Now I find out that if I have the line:

Play Vimeo video

in the explanation field and it is the last question it will open a new tab and show video on Vimeo sajt. This goes also for images. The lightbox only works if the question is not the last questiun. But if the video link is not the last question it only open the lightbox with an 404 message.

Is it possible to see the problem?

Regards,
ARI Soft

We sent the answer by email. In brief, you use "ARI Sexy Lightbox Lite" plugin instead of "System - ARI Sexy Lightbox" plugin.

Regards,
ARI Soft
