## 404 for Vimeo Videos
Posted by mloeb - 2014/04/14 20:25

_____

Hello,
I'm trying to load Vimeo videos in these lightboxes and I keep getting 404 errors, though the links are correct. The site is running locally now, so I don't have an example to show.

_____

Hello,

If you use the module, send screenshot(s) of module settings page by email. If you use plugin, send plugin code which you use.

Regards,
ARI Soft

_____

Solved, I wasn't formatting the links properly.

I have also this problem. I have got the images to work with Quiz but now when I try to include the Vimeo link that you are using on the demo page for sexy lightbox I got a 404 message.

"a href="http://vimeo.com/8245346?width=500&height=350&background=#000" rel="sexylightbox" title="Vimeo video">Play Vimeo video" http://www.ari-soft.com/images/fbfiles/images/Arivideo.PNG

_____

The sample code is here. Add http:// before vimeo.com

Regards,
ARI Soft

_____

I must have done something wrong with cut & past so I made a screen dump instead. For me it looks right. http://www.ari-soft.com/images/fbfiles/images/Arivideo_2.jpg

_____

Now I find out that if I have the line:

Play Vimeo video
in the explanation field and it is the last question it will open a new tab and show video on Vimeo sajt. This goes also for images. The lightbox only works if the question is not the last questiuon. But if the video link is not the last question it only open the lightbox with an 404 message.

_____

We sent the answer by email. In brief, you use "ARI Sexy Lightbox Lite" plugin instead of "System - ARI Sexy Lightbox" plugin.

Regards,
ARI Soft
