
After Update images are really tiny when clicked

Posted by redsage - 2014/07/11 13:53

We updated the component last week after the flickr api fiasco (we have multiple sites using this component) and so far I've had on report of this problem...the thumbnails are sized correctly, however, when you click on them they open in the lightbox and they're even smaller than the thumbnail.

I have the settings on the module set to show the 500px on longest side - so what's going on? this wasn't happening before the update.

thanks!

Hello,

Where we can see the problem?

Duh sorry about that.

<http://www.arthurorr.com/photos/gallery-2014>

there are three galleries - all three are exhibiting this behavior

Try to temporary disable "ARI Sexy Thumbnails" plugin.
