Dynamic video image

Posted by ksilenio - 2014/08/16 18:34

_____

Hi
With your help i have wrote in the php file the code to see the visitor a video in a product
So far so good but i have a small issue
All the videos are not the same (the size of the picture) some are small some are bigger
Now is it possible to suit the display screen depending the size?
The code is in the image
Thank you for your time http://www.ari-soft.com/images/fbfiles/images/image98.JPG

_____

Hello,

Size of the lightbox (width and height) can be defined in HTML code otherwise default size will be used which is defined in plugin settings.

Regards,
ARI Soft

_____

Hi
thank you for your answer but i am looking something automatic
Is that possible?
Regards

_____

No, the extension doesn't provide this ability for video files.

Regards,
ARI Soft

Hi
OK thank you for your time
Regards
PS
Sorry about that but can you tell me because i can't remeber from where adjust the width and the size but only for the video
