## No Lightbox / Full Article View

First of all: great plugin!

To my problem:

The Lightbox (full version) works fine on my main page where articles are displayed.

However, if you click open the article to full mode, thumbnails are shown, but open as an image instead of the lightbox showing up.

Searched the Forum and tried the loadjQuery="true"-trick but it doesn't work for me.

How can I fix this issue?

Michael
