Link Image to YouTube

Posted by jimnickerson - 2014/09/30 13:37

_____

Hello,
Is there a way to connect an image to a YouTube clip using Sexy Lightbox in the same way that text links to a YouTube clip (so that the box will open over the page.) Thanks

_____

Hello,

Use HTML tag to use an image instead of text link. For example sample code for "ARI Sexy Lightbox Anyhwhere" plugin below:

{arisexylightbox activeType="rcontent" width="800" height="450" url="http://www.youtube.com/watch?v=WyA1dzfKywg" title="Video"}

{/arisexylightbox}

Regards,
ARI Soft

_____

I have been trying to use this code in my site and can't get it to work. Could you please provide the entire HTML statement required for sexylightbox to display a YouTube video? I'm using the IMG tag as you suggest but no amount of tweaking or coding makes this work for me. I have installed Smart Content and enabled every component and plug-in it came with and I'm getting nowhere.

I am attempting to place an image in a table and have sexylightbox show a YouTube video when the image is clicked on: Here's my code based on the sample above:

{arisexylightbox activeType="rcontent" width="133" height="200" url="http://www.youtube.com/watch?v=2MeVZ-CaVXU" title="Video"} {/arisexylightbox}

Unfortunately the result is the image with the sexylightbox code on top of it (see image).

Anyone?

Thank you... http://www.ari-soft.com/images/fbfiles/images/ari_techsupport1.jpg

_____

Hello,

This topis is about "ARI Sexy Lightbox" extension and plugin codes in this topic for "ARI Sexy Lightbox" extension, not for "ARI Smart Content - Sexy Lightbox" plugin. Documentation for "ARI Smart Content - Sexy Lightbox" plugin is here.

Sample code for YouTube video:

{sexybox yt="WyA1dzfKywg" width="500" height="375"}Show video from YouTube{/sexybox}

Regards,
ARI Soft

_____

I did not realize they were two different things.

Let me try this...:)
